Sir:

Responsive to the Office Action of August 18, 2005, please
amend the application as follows:

Page 5, amend the paragraph in lines 15-16 as follows:

Figure 6 is an end view of the additional scrubbing element shown in Figure 32;

Amend the paragraph bridging pages 9 and 10 as follows:

Figures 7a-7d show an additional scrubbing element which is identified as a whole with reference numeral 9 and is formed as a brush. It has a body 10 and a plurality of bristles 11 extending from the body 10. The body 10 can be provided with the side openings 5" (Figures 7a, 7b) with a plurality of axes-parallel throughgoing openings 5'" (Figures 7c) or with a central opening 12 (Figure 8d7d). When the additional scrubbing element 9 is attached to the showerhead 2, for example by snap-on, and water issues from the showerhead 2, it passes through the opening 5", 5'" or 12 of the additional scrubbing element 9, and at the same time the user can use the additional scrubbing element 9, in particular its bristles 11 for applying a corresponding action to the user's body.
